2019**

Report on Teachers' Feedback on Curriculum

Teachers provided critical feedback on various aspects of the curriculum, suggesting potential changes to improve its effectiveness.

Learning Objectives: Suggestions were made to refine and clarify learning objectives to ensure alignment with course content and assessment methods.

Course Sequence and Content Organization: There was general agreement among teachers that the sequence of courses in the curriculum and the organization of content were appropriate.

Credit Allocation: The allocation of credits to courses was deemed appropriate by most teachers, reflecting the level of coursework required.

Electives: Teachers felt that the electives offered were relevant to the core subject and facilitated specialization. Few teachers others raised concerns about limited options or the need for additional electives to cater to diverse student interests and career paths.

Laboratory Experiments: Feedback on laboratory experiments was generally positive, with teachers acknowledging their role in enhancing understanding of concepts and promoting experimental learning. Suggestions were made to diversify experiments, incorporate more real-world applications, and ensure adequate resources and support for conducting experiments effectively.
