374 responses

The curriculum instils professional ethics among the students.

373 responses

The curriculum contributes to the overall personality of the student.

374 responses

Important suggestions by the Alumni

1. Curriculum can be more research oriented or providing more practical skills to the students as it is very much important for Biotechnology subject. All the facilities and equipments are available in the department and also having excellent teaching faculties. College can also try to strengthen the placement cell involving the emerging Biotechnology companies.
2. Need to do internship during their break after each semester or each year so that they relate to what they study.
3. While doing final year projects or taking classes, try to bring out new methods and new ideas for teaching and new and relevant topics which is more over like a reference study project.
4. Need practical training sessions as an additional course for example -Tally
5. I would recommend the inclusion of atleast 6 month major project which would make about 25% of the overall curriculum as research component to facilitate the eligibility for overseas higher education.
